Deferred Compensation Program and Dependent Care Assistance Program

Historical Background

1981-1984

The Committee for Deferred Compensation was initiated in 1981 to administer the Deferred Compensation Program (DCP), with the first payroll deferrals beginning in October 1981. During 1981 to 1984, the Committee contracted with National Plan Coordinators, Inc. (NPC) to provide administrative and marketing services.

1985-1987

On January 1, 1985, the Committee transferred administrative functions to its staff and reduced NPC's role to marketing and consulting. From July 20, 1985, through July 20, 1986, the Committee assumed marketing responsibility using contracted marketing representatives. Since 1986 the Committee has employed its own marketing personnel.

1988-1990

In 1988 the Committee initiated the Dependent Care Assistance Program (DCAP) for state employees. In 1989 and 1990 the Committee received favorable rulings from the Internal Revenue Service about the eligible status of the IRC Section 457 deferred compensation plan. These followed various amendments to the plan to accommodate changes in federal tax laws.

1991-1994

In 1991 the Committee added a second marketer, in Spokane, to serve the eastern side of the state. In 1993 OFM completed a legis-

lative mandated study of the DCP. The report recommended no changes. The Committee began publishing an "Investment Handbook." In 1994 the Committee published a new Payout Brochure to assist DCP participants with their payout decisions.

1996-1998

On July 1, 1996, the Department of Retirement Systems began to administer the DCP and the DCAP. In January 1997, the DCP received a first place award from Pensions and Investments magazine in the category of "Ongoing Education-Public Funds." The award was based on the Quarterly Reports which DCP staff produced and mailed to participants during the fiscal year ended June 30, 1996. In June 1998, the State of Washington DCP plan assets were placed into trust for the exclusive benefit of participants and their beneficiaries pursuant to Governmental Accounting Standards Board (GASB) Statement No. 32.

1999-Present

On May 1, 1999, the DCP web site was enhanced to include a web page dedicated to posting the daily net asset value for each investment option available through DCP. This project was highlighted along with other top state agency quality improvements in the seventh issue of "Governing for Results."

¹ Revenues associated with the Dependent Care Salary Reduction Program flow initially to various state agencies in the form of employer OASDI and Medicare tax savings, the State Treasurer in the form of interest, and to the dependent care administrative fund in the form of forfeitures. The figures for OASDI estimated tax savings are after removal of salary reductions deemed to occur above the taxable wage base.

² The agency attempts to avoid forfeitures. Forfeiture is required under federal law when a participant sets aside a greater amount than s/he incurs and is able to have reimbursed by the program. The number and amount of forfeitures are determined as of March 31, the annual deadline for submitting claims for reimbursement of expenses.

³ Effective July 1, 1993, by legislative direction, the Committee for Deferred Compensation (now DRS) bills state agencies with participating employees a percentage of the payroll taxes saved by the agency and uses these amounts to operate the program. The 1995-1996 expenditures include data processing and other costs related to shifting to the new billing system. Previously, agencies were permitted to retain all of these payroll tax savings. Now they retain approximately 58 percent of the savings.

⁴ 1996 expenditures do not reflect a \$10,000 return from the Department of Information Systems in January 1997, progress payments on a mainframe to a personal computer conversion program which was abandoned by mutual agreement, and include one-time expenditures related to the 1996 merger of CDC and DRS.
